

ArkadinLounge™

ArkadinLounge™ is our online conferencing portal that provides instant and unified access to all audio and web services with a host of functions for easy account management.

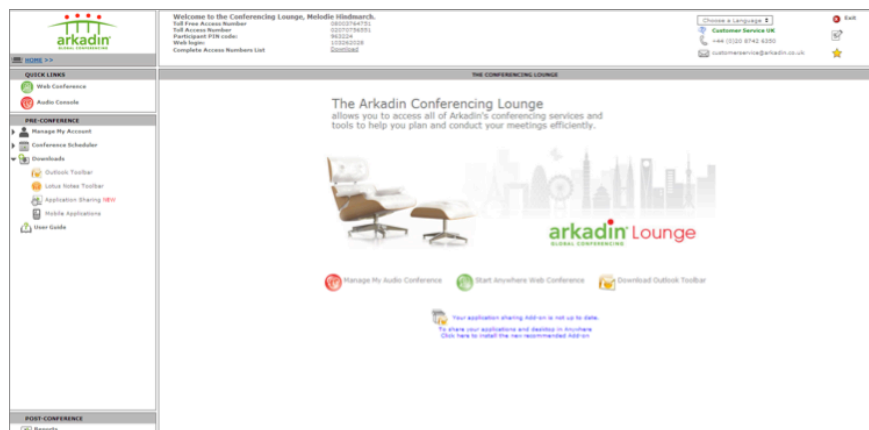

ArkadinLounge™

In ArkadinLounge™ you can simply manage the organization of your conferences from a single location thanks to an array of practical features:

Benefits

- One-click access to live audio & web conferencing
- One-time user PIN code generation for added security, using a unique set of pin codes that are only valid for the defined period
- Direct access to your local live customer service assistance
- Download supporting documentation (user guides, service sheets, etc.)
- Productivity tools to be downloaded for free:
 - Outlook and Lotus Notes Toolbars to immediately send invitations from your mailing box with an automatic generation of phone numbers and URLs to connect to your audio and web conferences
 - Blackberry mobile application to connect automatically to a conference from your mobile phone thanks to a “call me back” function
- Simplified access to usage report for your account, detailing the dates & times of your conferences
- ArkadinAnytime Audio Console is accessed in one click from the Lounge and gives you a visual overview of the call settings, even if you are only using audio conferencing. Simple and intuitive to operate, it offer the functionality to set many of your call preferences online including:
 - recording the call
 - muting participants
 - turning the roll call on or off
 - allocating the call to a billing code

Features

- Conference scheduling and invitation tools
- Content bank management, upload up to 20MB of files at any time and share during your meetings
- Audio and web account settings management
- Personal settings (access numbers, PIN codes, direct links).
- Address book import
