

ArkadinVideo

Face to face, video meetings.

ArkadinVideo, a revolutionary HD video conferencing solution, enables up to 15 participants to meet “face to face” with one click from the desktop. ArkadinVideo gives participants the chance to see each others’ body language and facial expressions, while saving the time and reducing travel costs associated with meeting at a single geographic location. With business productivity dependent on how individuals within and outside and organization interact, ArkadinVideo can help your employees to work more efficiently by enabling closer business collaboration.

ArkadinVideo

ArkadinVideo is a high definition video conferencing solution delivered as a service. With no expensive hardware or costly dedicated networks required, it makes natural, face to face communication available to everyone - from the office, home or while travelling. Accessible on demand from anywhere, to anywhere, over general-purpose IP networks (including any broadband Internet connection,) ArkadinVideo offers the best of video conferencing to the maximum number of users.

ArkadinVideo Applications

ArkadinVideo can be used for:

- Informal Meetings
- Training
- Internal Meetings
- Announcements
- Media briefings
