Cloud calling service available for deployment in 24 countries for domestic PSTN replacement

Reach More Customers

- 1 Reach more customers with a full cloud PSTN calling access, natively integrated with Cisco Webex Calling
- 2 Demonstrate reduced customer costs with no hardware required to be managed on the network for calling services
- 3 Availability in over 24 countries. Global geographic coverage to support enterprises with multi-country presence
- 4 Voice services delivered over NTT's Tier 1 MPLS Network
- 5 Benefit from a compensation plan with accelerators for increased business levels

A full cloud calling service natively integrated with Webex Calling

For Cisco VARs, Cloud Connected PSTN for Webex Calling delivers the capability for resellers to propose a full cloud calling service for their Webex customers.

For customers that require a full cloud service, no on-site managed hardware and attractive calling plans that fit their enterprise needs, being able to propose a full cloud service delivers on customer expectation.

Deliver value to your Webex Calling customers on their transition to the cloud with a natively integrated PSTN service provided by the Cloud Communications division of NTT.

Cloud Connected PSTN for Webex Calling

A complete cloud calling solution that reduces costs and enables Cisco VARs to offer more value to their customers.

Cisco collaboration reseller manages the customer, with the Cloud Communications division of NTT simply providing the PSTN replacement capability with Webex Calling, supplying domestic dial out coverage in 24 countries.
