Cloud Connected Audio | Provided by
arkadin

Enjoy a superior experience and premium audio quality from anywhere, on any device, while significantly reducing costs

Natively integrate Cisco audio, web, and video conferencing with a predictable monthly cost model hosted in the Cisco Cloud

Complete WebEx integration

- Seamlessly integrate with Cisco WebEx and Cisco CMR, ensuring a seamless user experience
- Quick updates and changes done from the Cisco Cloud
- Leverage your current on-premise IP telephony infrastructure to reduce costs and invoices
- Arkadin's change management, deployment, adoption, and 24/7 support services
- Arkadin's online customer portal for tracking usage and generating reports

Significant cost savings

- 100% OPEX and enterprise-wide pricing options that provide a predictable monthly cost model
- Eliminate local and long distance PSTN variable charges
- On-net PSTN calling with bi-directional SIP trunking
- Utilising VoIP will significantly reduce investment
- Reduce telecom charges by utilizing Arkadin's global MPLS network

Premium audio quality

- Audio bridging hosted and managed in the Cisco Cloud
- Better quality of service for VoIP as Cisco's Cloud reduces compression requirements
- Unlimited number of participants
- Over 60 local, toll, and toll-free access options provided by Arkadin

"Cisco collaboration tools are helping us enhance and redirect time back into patient care. When we hear from our users that technology has made their lives easier, we know we've succeeded."
