

The Benefits of Implementing Skype for Business

An entire organization benefits by beginning a Digital Transformation. Here are just a few of the benefits you'll experience by implementing Skype for Business:

IT Benefits

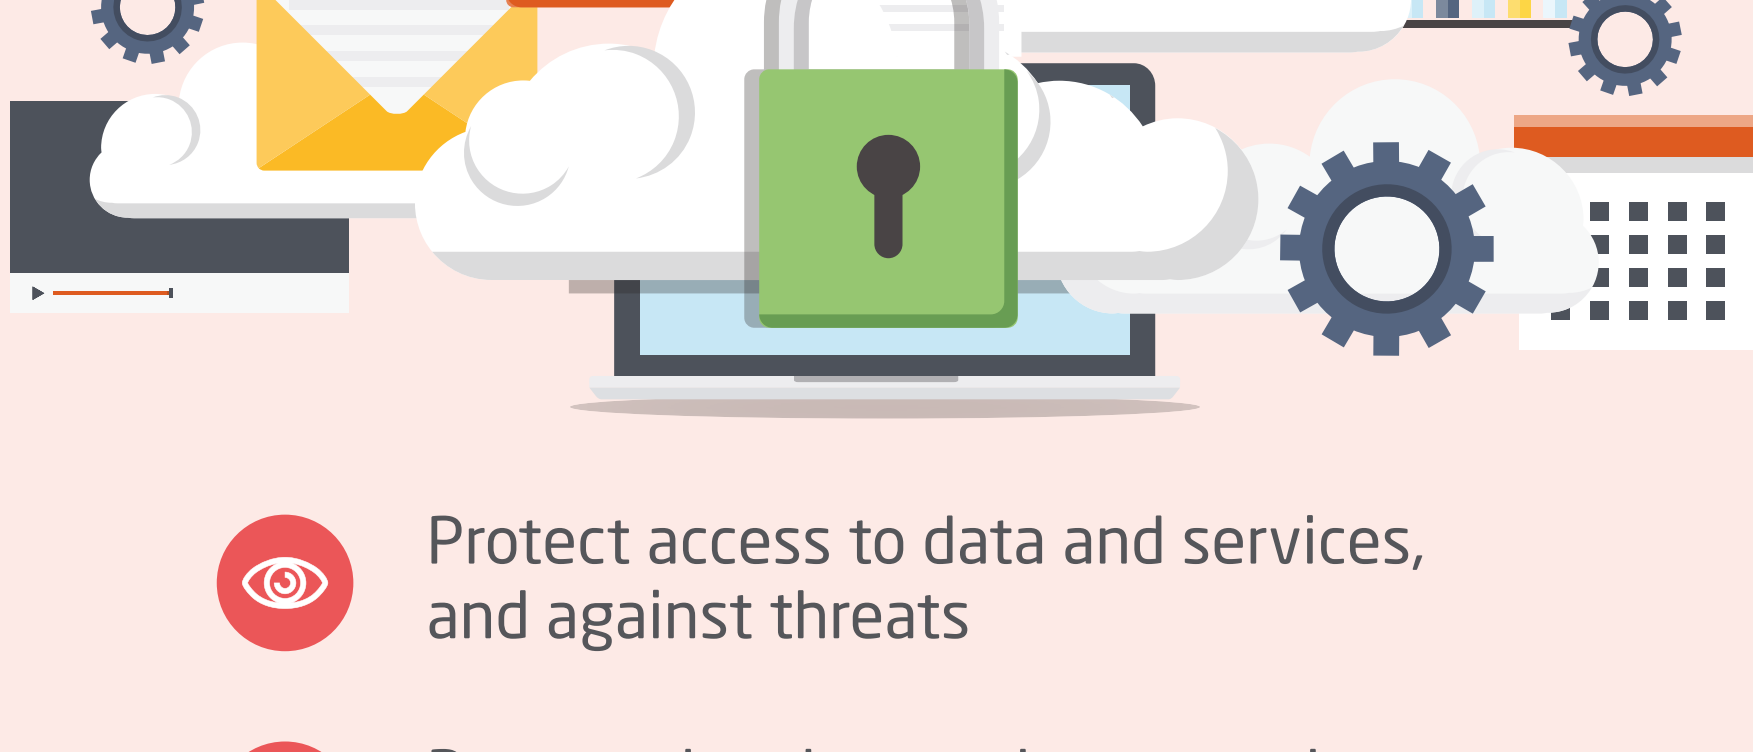

64% of tech professionals say a lack of resources to maintain systems and develop new digital services is a roadblock to transformation

- Outsource platform management and support to focus on strategic projects
- Use managed services to augment your internal IT staff
- Integrate with existing tech like PBXs and legacy video room systems
- Experience rapid service deployment
- Standardize tools company-wide for reduced end-user training
- Bridge tomorrow's needs with today's tools and infrastructure
- Simplify management
- Improve scalability, agility and flexibility
- Ensure business continuity

Security Benefits

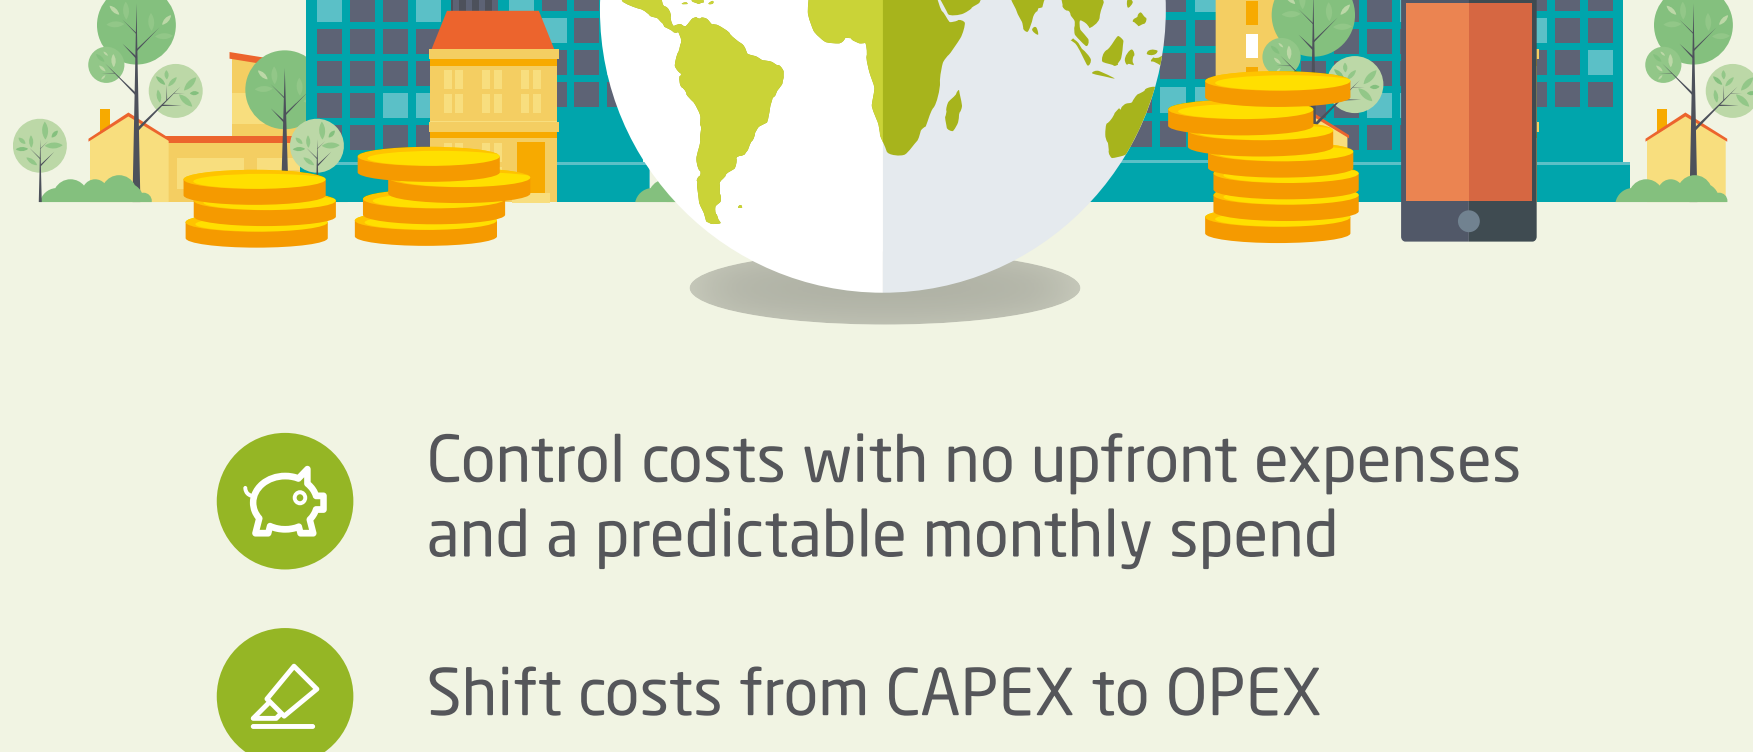

Microsoft takes security and compliance to the next level with built-in privacy, transparency, and user controls, and conforms to ISO/IEC 27018

- Protect access to data and services, and against threats
- Prevent data loss and manage data governance
- Improve data retention and reduce "brain drain"

Financial Benefits

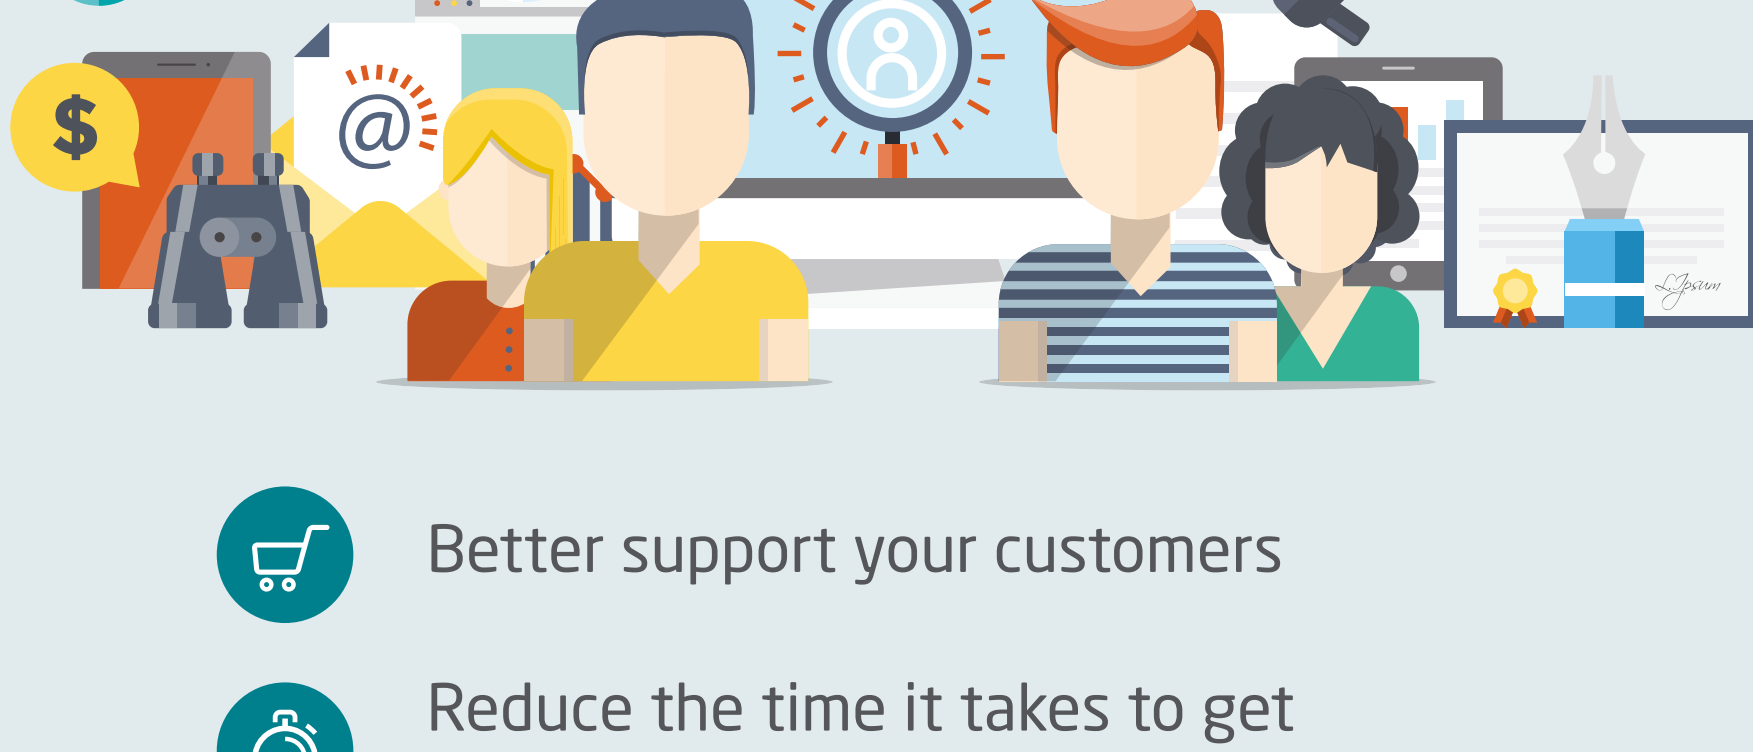

Digital transformation is expected to boost the bottom line by more than 50% for many companies over the next five years

- Control costs with no upfront expenses and a predictable monthly spend
- Shift costs from CAPEX to OPEX
- Reduce or eliminate support charges and operating costs
- Eliminate third-party conferencing costs
- Experience lower total cost of ownership
- Scale provisioning to reduce higher minimum spends
- Implement meaningful service-level agreements
- Eliminate hardware replacement and maintenance costs
- Reduce IT management spending
- Increase profits with improved productivity by revenue-generating departments

Communications Benefits

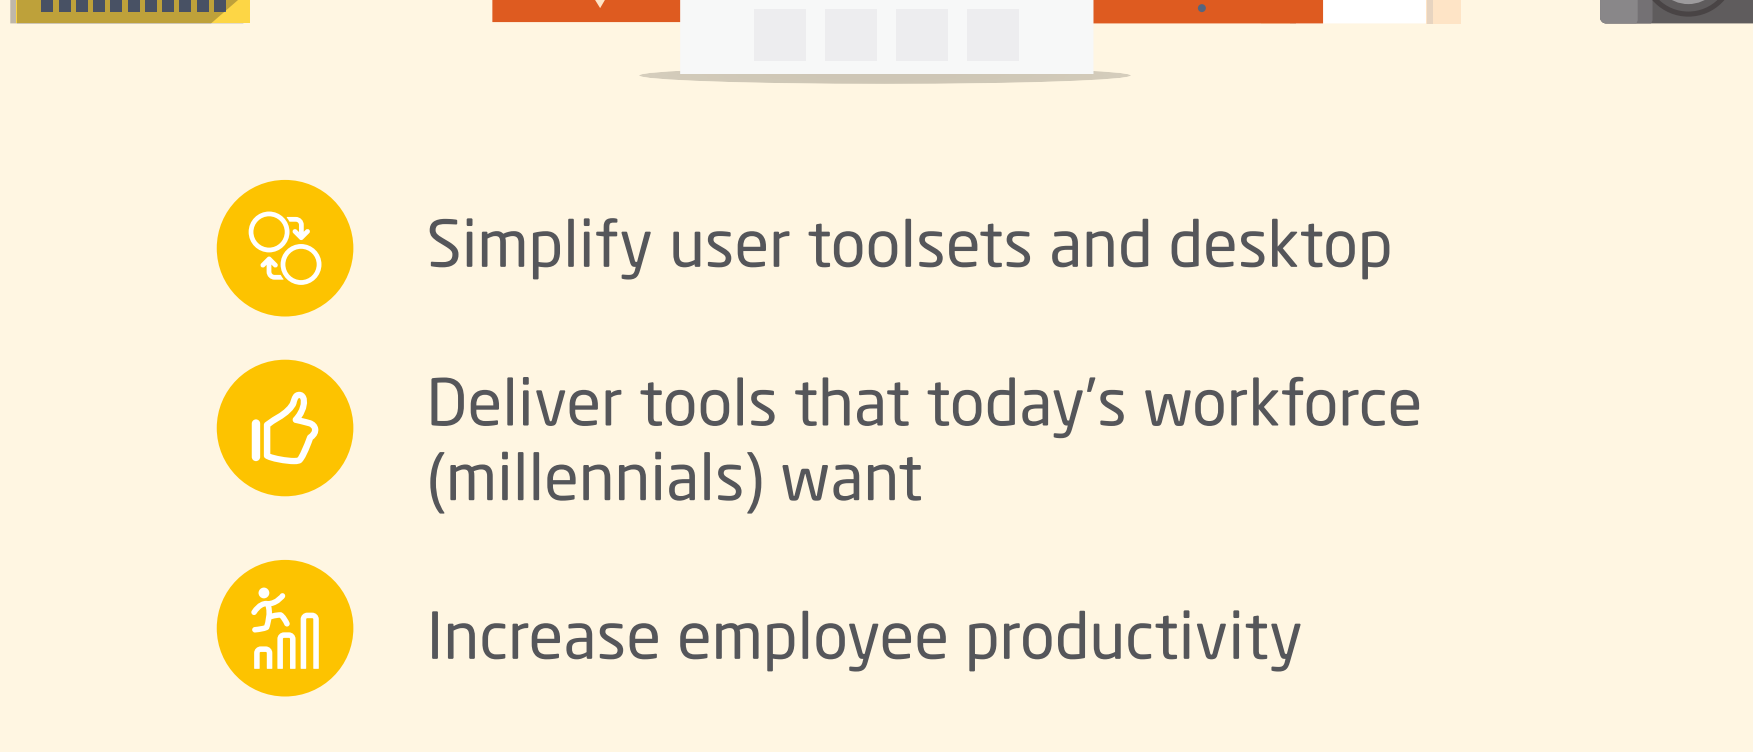

34% of candidates think improved comms improve the candidate experience, and 14% would like more human contact

- Better support your customers
- Reduce the time it takes to get answers and make decisions
- Find qualified candidates faster with video interviews
- Create more direct lines of communication - between peers and up to executives
- Reduce hiring, onboarding and ongoing training costs
- Increase HR department productivity and resources

Employee Benefits

More than 90% of executives believe technology has the potential to fundamentally transform the way people work

- Simplify user toolsets and desktop
- Deliver tools that today's workforce (millennials) want
- Increase employee productivity
- Save time setting up meetings and spend more time getting things done
