Adobe Connect is a powerful audio, web, and video conferencing solution, delivered 'as a Service' by Arkadin

Adobe Connect web conferencing offers immersive online meeting experiences for collaboration, virtual classrooms, and large scale webinars

Adobe Connect Meetings

- Enable rich, web-based collaboration for your employees, partners, and customers
- Engage with attendees on the go using comprehensive mobile applications
- Create a personal digital office in the Cloud using content management tools
- Ensure secure communication and compliance for your critical meetings
- Turn every meeting into a knowledge asset by recording and indexing

Adobe Connect Webinars

- Manage the full event lifecycle online from registration, to live event, to post event follow-up
- Improve attendance of marketing events through engaging event landing pages, customized registration, and online reporting
- Convert prospects to leads with superior event engagement
- Identify the most relevant prospects and integrate with existing enterprise systems

Adobe Connect Learning

- Create and manage learning courses and curriculums
- Educate students through immersive experiences in live and on-demand classes
- Efficiently manage and track training
- Quickly increase knowledge base of your sales teams through effective online education
- Easily integrate with Learning Management Systems (LMS) of web and video solutions

"The ease of use that Adobe Connect offers has been the biggest breakthrough for us. Our previous web meeting solutions didn't enable us to convey the messages we wanted. We can't sell our services as time saving and effective if a demo isn't easy to join. With Adobe Connect, it's just one click and you're in!"

Elise Brogan

Marketing Channel Manager, Corporation Service Company
