arkadin[®]video

– Managed Services –

A video managed solution that puts the industry's most sophisticated technology to work for your organization

Arkadin Video Managed Services provide an optimal video experience, regardless of your existing endpoint or network

Simple to use

- Robust portfolio of video bridging services, IP (HD and SD), and ISDN, so that you can connect via your preferred network
- Operated assisted and on-demand options for flexibility of desired conference involvement
- Add best-in-class audio conferencing to any call for participants
- Let Arkadin schedule, connect, monitor, and manage the entire event from start to finish

Reliable on any device

- SLAs to ensure the highest quality standards for your video conference
- Secure and redundant global infrastructure so that you can have piece of mind to run your call
- Standards compliant and compatible with all major video conferencing endpoints
- Our team of experts can certify your sites to ensure a secure quality connection to every call

Scalable for any size meeting

- Meet and greet, and full-time event management services available to support your video conference
- Available 24/7/365 so that you can have your call when it is most convenient to you
- SIP/IP Trunks and other professional services available
- Features Cloud-based video connectivity for standard and HD video calls

"Our goal was to align with an entity like Arkadin that is at the forefront of video technology. Arkadin helped us develop the right video conferencing platform 'as a service' for our members. We were able to offer the service without charging our members additional fees which made adoption easier."

Eric Brown

CEO, California Telehealth Network
