

## [Enjoy business benefits]

- 1 Intuitive interface for the ultimate Unified Communications experience
- 2 Delivered in the Cloud for a fast and scalable international deployment with high ROI
- 3 Hosted IP telephony avoids high investment in PBX equipment and maintenance
- 4 High-quality audio irrespective of the number of internal and external participants
- 5 User training, customer service 24/7, and professional services

## Skype for Business powered by Arkadin

Skype for Business is seamlessly combined with Arkadin's premium audio conferencing to offer access to all communication and collaboration applications in a single user interface.

Delivered 'as a Service' on our secure, private Cloud platform, hosted Skype for Business powered by Arkadin offers a fast and high ROI.

A superior UC experience, featuring the SaaS benefits of high flexibility and low cost of ownership

## Skype for Business powered by Arkadin in the Cloud for a fast, scalable, and efficient Unified Communications roll-out adapted to your specific needs

### Unique UC interface

- Instant chat and file sharing with all your contacts using Skype for Business
- Face-to-face collaboration and application sharing with multiple participants thanks to the conferencing capabilities of Skype for Business
- Advanced telephony functions straight from Skype for Business, including softphone client, call management, and simultaneous ringing
- All UC capabilities from any mobile device connected to the internet

### Audio seamlessly integrated

- Arkadin audio conferences in real-time straight from your Skype for Business desktop
- Whatever the number of internal and external guests, Arkadin audio is always stable and crystal clear
- Unique hybrid audio capability enables internal VoIP users and external parties using PSTN telephony to meet in-conference
- Arkadin live assistance 24/7 during audio conference by simply dialing \*0

### Scalable deployment with fast ROI

- No server maintenance costs, minimum IT resources, and automatic product upgrades
- PBX replacement: Telephony embedded in Skype for Business, avoiding on-premise equipment
- Security and reliability provided by Arkadin's private Cloud platform
- Arkadin Professional Services assist you throughout the deployment of your solution and beyond

"The Arkadin team really engages with users, taking care of their needs and responding to their questions. This makes the relationship between our two organizations painless. For Bemis, it is about ease of use and cost-effectiveness and we feel that Arkadin delivers on this promise."
